Reviewers

Lorraine Doucette, MS, MLS(ASCP)CM
Associate Professor and Medical Laboratory Technician Program Coordinator
Anne Arundel Community College
Arnold, Maryland

Pamela B. Lonergan, MS, MT(ASCP)SC
Medical Technology Program Director
Department of Nursing and Allied Health
Norfolk State University
Norfolk, Virginia

Jessica Loontjer, MLS(ASCP)CM, LS(ASCP)CM
Clinical Instructor, Special Chemistry and Urinalysis/Body Fluids
Nebraska Methodist Hospital Laboratory
Omaha, Nebraska

Michelle Moy, MAd Ed, MT(ASCP)SC
Program Director
Clinical Laboratory Science Program
Loyola University
Chicago, Illinois

C. Thomas Somma, PhD
Associate Professor
School of Medical Diagnostics and Translational Sciences
College of Health Sciences
Old Dominion University
Norfolk, Virginia
Contents

PART ONE: Background

CHAPTER 1
Safety and Quality Assessment 3

SAFETY 4
Biologic Hazards 4
  Personal Protective Equipment 7
  Hand Hygiene 7
  Biologic Waste Disposal 9
Sharpm Hazards 9
Chemical Hazards 10
  Chemical Spills and Exposure 10
  Chemical Handling 10
  Chemical Hygiene Plan 10
  Chemical Labeling 10
  Material Safety Data Sheets 10
Radioactive Hazards 11
Electrical Hazards 11
Fire/Explosive Hazards 12
Physical Hazards 13
QUALITY ASSESSMENT 13
Urinalysis Procedure Manual 14
  Preexamination Variables 14
  Examination Variables 16
  Postexamination Variables 20

CHAPTER 2
Introduction to Urinalysis 27
  History and Importance 28
  Urine Formation 29
  Urine Composition 29
  Urine Volume 29
  Specimen Collection 30
    Containers 30
    Labels 30
    Requisitions 31
  Specimen Rejection 31
  Specimen Handling 31
    Specimen Integrity 31
    Specimen Preservation 31
Types of Specimens 32
  Random Specimen 32
  First Morning Specimen 33
  24-Hour (or Timed) Specimen 33
  Catheterized Specimen 34
  Midstream Clean-Catch Specimen 34

CHAPTER 3
Renal Function 39
  Renal Physiology 40
    Renal Blood Flow 40
    Glomerular Filtration 41
    Tubular Reabsorption 43
    Tubular Secretion 45
  Renal Function Tests 46
    Glomerular Filtration Tests 47
    Cystatin C 49
    Tubular Reabsorption Tests 50
    Tubular Secretion and Renal Blood Flow Tests 52

PART TWO: Urinalysis

CHAPTER 4
Physical Examination of Urine 59
  Color 60
    Normal Urine Color 60
    Abnormal Urine Color 61
  Clarity 62
    Normal Clarity 62
    Nonpathologic Turbidity 63
    Pathologic Turbidity 63
  Specific Gravity 63
    Refractometer 64
    Osmolality 65
    Reagent Strip Specific Gravity 66
  Odor 66

CHAPTER 5
Chemical Examination of Urine 71
  Reagent Strips 72
    Reagent Strip Technique 72
    Handling and Storing Reagent Strips 73
    Quality Control of Reagent Strips 73
    Confirmatory Testing 73
  pH 73
    Clinical Significance 73
    Reagent Strip Reactions 75
  Protein 75
    Clinical Significance 75
    Prerenal Proteinuria 75
Contents

Renal Proteinuria  76
Postrenal Proteinuria  76
Reagent Strip Reactions  77
Reaction Interference  77

Glucose  79
Clinical Significance  79
Reagent Strip (Glucose Oxidase) Reaction  81
Reaction Interference  81
Copper Reduction Test (Clinitest)  81
Clinical Significance of Clinitest  82

Ketones  82
Clinical Significance  82
Reagent Strip Reactions  83
Reaction Interference  83

Blood  83
Clinical Significance  84
Hematuria  84
Hemoglobinuria  84
Myoglobinuria  84
Reagent Strip Reactions  84
Reaction Interference  85

Bilirubin  85
Bilirubin Production  85
Clinical Significance  86
Reagent Strip (Diazo) Reactions  87
Reaction Interference  87

Urobilinogen  87
Clinical Significance  88
Reagent Strip Reactions and Interference  88
Reaction Interference  88

Nitrite  88
Clinical Significance  88
Reagent Strip Reactions  89
Reaction Interference  89

Leukocyte Esterase  90
Clinical Significance  90
Reagent Strip Reaction  90
Reaction Interference  91

Specific Gravity  91
Reagent Strip Reaction  91
Reaction Interference  92

CHAPTER 6
Microscopic Examination of Urine  99

Macroscopic Screening  100
Specimen Preparation  100
Specimen Volume  100
Centrifugation  100
Sediment Preparation  101
Volume of Sediment Examined  101
Commercial Systems  101
Examining the Sediment  101
Reporting the Microscopic Examination  101
Correlating Results  102

Sediment Examination Techniques  102
Sediment Stains  103
Cytodiagnostic Urine Testing  105
Microscopy  105
Types of Microscopy  107

Urine Sediment Constituents  110
Red Blood Cells  110
White Blood Cells  112
Epithelial Cells  113
Bacteria  118
Yeast  119
Parasites  119
Spermatozoa  120
Mucus  120
Casts  121
Urinary Crystals  128
Urinary Sediment Artifacts  138

CHAPTER 7
Renal Disease  147

Glomerular Disorders  148
Glomerulonephritis  148
Nephrotic Syndrome  149

Tubular Disorders  150
Acute Tubular Necrosis  150
Hereditary and Metabolic Tubular Disorders  153

Interstitial Disorders  154
Acute Pyelonephritis  155
Chronic Pyelonephritis  155
Acute Interstitial Nephritis  155

Renal Failure  155

Renal Lithiasis  157

CHAPTER 8
Urine Screening for Metabolic Disorders  163

Overflow Versus Renal Disorders  164
Newborn Screening Tests  164

Amino Acid Disorders  165
Phenylalanine-Tyrosine Disorders  165
Branched-Chain Amino Acid Disorders  167
Tryptophan Disorders  168
Cystine Disorders  169

Porphyrin Disorders  170
Mucopolysaccharide Disorders  172
Purine Disorders  174
Carbohydrate Disorders  174

PART THREE: Other Body Fluids

CHAPTER 9
Cerebrospinal Fluid  181

Formation and Physiology  182
Specimen Collection and Handling  182
Appearance 183
Traumatic Collection (Tap) 184
   Uneven Blood Distribution 184
   Clot Formation 184
   Xanthochromic Supernatant 185
Cell Count 185
   Methodology 185
   Total Cell Count 186
   WBC Count 186
   Quality Control of CSF and Other Body Fluid Cell Counts 186
Differential Count on a CSF Specimen 186
   Cytocentrifugation 186
   CSF Cellular Constituents 187
Chemistry Tests 193
   Cerebrospinal Protein 193
   CSF Glucose 196
   CSF Lactate 195
   CSF Glutamine 195
Microbiology Tests 195
   Gram Stain 196
SeroLogic Testing 197

CHAPTER 10
Semen 203
   Physiology 204
   Specimen Collection 205
      Specimen Handling 205
   Semen Analysis 205
      Appearance 205
      Liquefaction 206
      Volume 206
      Viscosity 206
      pH 207
      Sperm Concentration and Sperm Count 207
      Sperm Motility 208
      Sperm Morphology 209
   Additional Testing 210
      Sperm Vitality 211
      Seminal Fluid Fructose 211
      Antisperm Antibodies 212
      Microbial and Chemical Testing 212
      Postvasectomy Semen Analysis 213
      Sperm Function Tests 213
      Semen Analysis Quality Control 213

CHAPTER 11
Synovial Fluid 217
   Physiology 218
   Specimen Collection and Handling 218
   Color and Clarity 219
   Viscosity 219

CHAPTER 12
Serous Fluid 229
   Formation 230
   Specimen Collection and Handling 230
   Transudates and Exudates 231
   General Laboratory Procedures 231
   Pleural Fluid 232
      Appearance 232
      Hematology Tests 232
      Chemistry Tests 235
      Microbiologic and Serologic Tests 236
   Pericardial Fluid 236
      Appearance 237
      Laboratory Tests 237
   Peritoneal Fluid 237
      Transudates Versus Exudates 237
      Appearance 238
      Laboratory Tests 238

CHAPTER 13
Amniotic Fluid 243
   Physiology 244
      Function 244
      Volume 244
      Chemical Composition 244
      Differentiating Maternal Urine From Amniotic Fluid 245
   Specimen Collection 245
      Indications for Amniocentesis 245
      Collection 246
   Specimen Handling and Processing 246
   Color and Appearance 246
   Tests for Fetal Distress 246
      Hemolytic Disease of the Newborn 246
      Neural Tube Defects 247
   Tests for Fetal Maturity 248
      Fetal Lung Maturity 248
      Lecithin-Sphingomyelin Ratio 248
      Phosphatidyl Glycerol 249
      Foam Stability Index 249
      Lamellar Bodies 249
CHAPTER 14

Fecal Analysis 255
   Physiology 256
   Diarrhea and Steatorrhea 257
      Diarrhea 257
      Steatorrhea 258
   Specimen Collection 258
   Macroscopic Screening 258
      Color 258
      Appearance 259
   Microscopic Examination of Feces 259
      Fecal Leukocytes 259
      Muscle Fibers 259
      Qualitative Fecal Fats 260
   Chemical Testing of Feces 261
      Occult Blood 261
      Quantitative Fecal Fat Testing 262
      APT Test (Fetal Hemoglobin) 263
      Fecal Enzymes 264
      Carbohydrates 264

CHAPTER 15

Vaginal Secretions 269
   Specimen Collection and Handling 270
   Color and Appearance 271

Diagnostic Tests 271
   pH 271
   Microscopic Procedures 272
Vaginal Disorders 277
   Bacterial Vaginosis 277
   Trichomoniasis 278
   Candidiasis 278
   Desquamative Inflammatory Vaginitis 279
   Atrophic Vaginitis 279
Additional Vaginal Secretion Procedures 279
   Fetal Fibronectin Test 279
   AmniSure Test 279

APPENDIX A Urine and Body Fluid Analysis Automation 283
APPENDIX B Bronchoalveolar Lavage 293
Answers to Study Questions and Case Studies and Clinical Situations 297
